The app's display remains static and does not switch between portrait and landscape modes when the device is rotated

AttachCreate subtaskLink issue

Description

The app's display remains static and does not switch between portrait and landscape modes when the device is rotated

1.Ensure the device's screen rotation setting is enabled

2.Open the app

3.Rotate the device from portrait to landscape mode

4.Pay attention that the app's display does not change orientation

Actual result: The app's display remains static and does not switch between portrait and landscape modes when the device is rotated

Expected result: When the device is rotated, the app's display automatically adjust and switch between portrait and landscape modes in accordance with the device's orientation
